Deputy R. Jarratt 5213
Court Security Division
Merced Superior Court, Family Law
Dept. 10, 1901 "G" Street Merced Ca. 95340
209.725.4166

Dear Mr. Chernekiff:

I would like to take this opportunity on behalf of the Court Services Division to thank Fisher Labs for allowing us to try out the "M" Scope Portable Walkthrough Metal Detector in our Family Law Court.

I have been a veteran of law enforcement for over 30 years and have participated in putting on workshops for security the most recent being the Northern California Security Training Seminar Workshop for Sheriff's and Marshal personnel at the Sacramento Hilton.

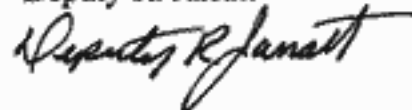

Because of legislative and State Constitutional Enactments, we have seen a number of changes in our courts, the way they are structure, and their responsibility of our citizens.

All of these above changes have impacted a number of California's Counties. Because of budgetary and fiscal constraints, security costs are a major concern, and cost both to the Court Administration and the Sheriff. We are searching for costs savings when given the opportunity.

Based on what I have seen, the "M" Scope is both economically efficient and would be a cost savings to our court security system if purchased, and will provide for a better structured court security system. I would also add that when the new court facility is completed. The "M" Scope walkthrough equipment can be transfer and adequately utilized at the new building.

We will continue to increase the security and protection of not only our bench officers but also employees and citizens as will with in our budgetary limits. Again thank you for giving us the opportunity to broaden our horizons for security equipment at affordable cost.

Deputy R. Jarratt

July 26, 2004

Mr. David Gmach
Western Radio Electronics
5775-B Chesapeake Court
San Diego, CA 92123

Dear Mr. Gmach,

I am writing you in regards to the M-Scope Security System and the effectiveness of this wonderful product. As you know the U.S.S. Ronald Reagan Gala event took place aboard the U.S.S. Midway this past July 23, 2004. Security was at it's highest and the M-Scope proved to be an essential part in achieving that goal. The set-up was very easy, uncomplicated and only took a matter of minutes to have it up and ready to use. Given the easy set-up compiled with its portability aspects it enhanced our security measures greatly. Not being tied down to plugs, but actually working with a device with it's own working battery, COME ON, how do you do better than that. The M-Scope made everybody feel safe from our Foreign Dignitaries, Corporate V.I.P'S, Military guests and City Officials, It was a huge hit. This event was a success, a success because of the M-Scope on our side of defense. I thought it would be appropriate, no necessary to write you and send my thanks for providing such an important and successful product.

Sincerely,
Keali'i Schreier
Captain

Director of Security

Re: Letter of Reference

I am the security director for CBS Television City in Los Angeles California. CBS TV City is the hub of Hollywood Studio Productions. CBS TV City houses several live Production shows that require audiences. Approximately 3000 people visit CBS TV City each week and they are all required to submit to a metal detection inspection.

We have been extremely happy with the Fisher M-Scope. It is very easy to operate and move around the studio lot as needed. We use the Fisher M-Scope 24 hours a day, seven days a week. My officers have commented on the ease of use, as well as the Fisher M-Scope ability to hold a battery charge for long periods of time.

In today's environment, it is comforting to know that CBS TV City deploys state of the art products such as the Fisher M-Scope.

Respectfully,

Ed Lujan
